Duplex Stainless Steel Axial Flow Non-slam Check Valve

Welcome to DBV VALVE, we collect a wide variety of commercial & industrial valves here for you. They are perfect for virtually every industrial process, including water and sewage processing, mining, power generation, processing of oil, gas and petroleum, food manufacturing, chemical and plastic manufacturing, and many other fields.

1. Model: E01
2. Brand: DBV or Custom
3. Custom Options: Size, pressure, material, connection type, operation type, logo, packaging, etc.
4. Available Materials: Stainless steel, Ductile iron, Carbon steel, Brass, Aluminium, Cast steel, Titanium, Bronze, etc.

Non Slam Check Valve for Sale

Welcome to DBV VALVE, we collect a wide variety of commercial & industrial valves here for you. They are perfect for virtually every industrial process, including water and sewage processing, mining, power generation, processing of oil, gas and petroleum, food manufacturing, chemical and plastic manufacturing, and many other fields.

1. Model: E01
2. Brand: DBV or Custom
3. Custom Options: Size, pressure, material, connection type, operation type, logo, packaging, etc.
4. Available Materials: Stainless steel, Ductile iron, Carbon steel, Brass, Aluminium, Cast steel, Titanium, Bronze, etc.

Duplex Stainless Steel Axial Flow Non-slam Check Valve

Product description:

Axial Flow Check Valve is designed with streamline chamber according to hydraulics theory. Its streamline chamber and inner flow guide body minimizes pressure loss.

Valve Description

Body Material	ASTM A995 Gr.5A
Nominal Pressure	CL300
Nominal Diameter	4"
End Connection	Flanged
Operation type	Automatic
Test & Inspection	API 598
Design Standard	API 6D

☰ Special Notes : We also can do special material according to customer's requirements

Valve Details

☰ Body design

Axial flow structure and accurate flowing passage enables little pressure loss ,stable medium flowing,and non cavitation erosion.

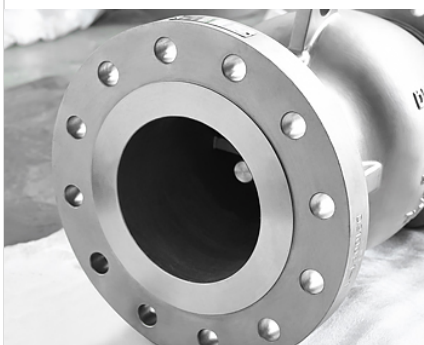

☰ Disc design

The special structure and surface treatment of the disc carrier and pin eliminates the phenomenon of valve sticking.It can close and open evenly to avoid the common defects of disc can not stay in the center of sealing position because of the gravity of disc. So the valve has wonderful and lasting sealing effect.

☰ Guiding Part

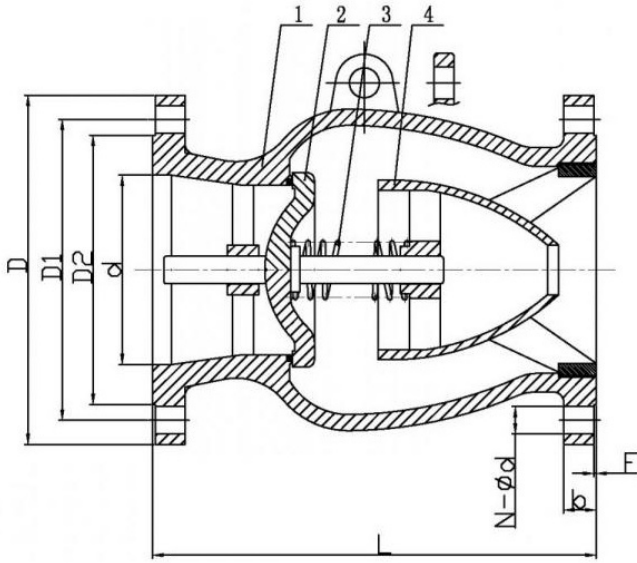

The guided spring loaded poppet system maximizes efficiency and reduces water hammer while preventing flow reversal. Designed for flanged installation, this valve will operate well in any position.

☰ Raise Face

DBV can produce valves with various end connection,such as RF,RTJ,BW,NPT,etc.The Rasied Face is the most common type used in process plant applications.
